

14 NOVEMBER SPACE ACADEMY

AT SALTIC RESORT & SPA ŁEBA

Space workshop programme:

14 NOVEMBER (Saturday): 11:00 - 17:00

- workshop on creating space-themed postcards with constellations
- creative space-themed Lego and Duplo brick zone on construction plates
- attempted observation and recording of the Moon and its setting (between 15:00 - 17:11, depending on weather conditions)
- observation and recording of the sunset on the beach using Seestar telescopes (around 15:48, depending on weather conditions)
- evening astronomical observations of star clusters, nebulae and galaxies (between 17:00 - 20:00, depending on weather conditions)
- observation of solar plasma eruptions through a Lunt telescope *
- observation of the Sun and sunspots in visible light using Seestar telescopes *
- smart landscape photography workshop in front of the hotel and/or on the beach *
- * depending on weather conditions

In case of bad weather, guests may choose from the following activities:

- lecture on solar activity and space weather, including how the aurora borealis is formed
- workshop on painting space-themed pictures on canvas, paper or paper plates
- workshop on using Seestar smart telescopes and classic optical telescopes, e.g. MAK 127
- Knowledge Zone: how to begin your own astronomical observations
- creative space-themed Lego and Duplo brick zone
- VR Education Zone: discovering the secrets of the Solar System
- original starry sky shows and educational films in the mobile planetarium
